

SEC-nn EXTENDER CABLE

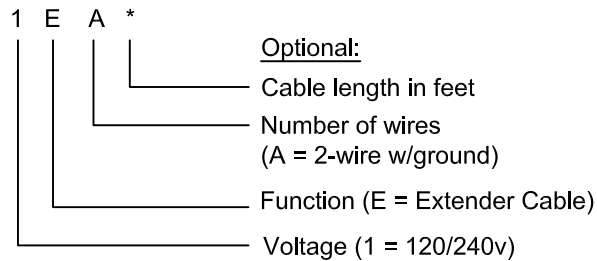

Description

The SEC-nn Extender Cable is a very versatile component used primarily to carry branch circuit power from MDB to SDB and RAF Floor Box. They are also utilized to extend the length of other cables.

It is manufactured from type MC cable and it consists of 90° C insulated, #12 AWG solid copper conductors and a #12 AWG solid copper ground

All Extender Cables are rated for the use of 20 ampere branch circuits, and are dead fronted for safety. To eliminate inter-voltage connection, each cable is keyed and color-coded to meet specific voltage requirements.

Catalog Number

NOTE : IBEW-assembled. UL-Listed and Labeled
